## Missing icons over synchronized files in NetSync

You installed NetSync on your Windows computer and you don't have overlays over your files anymore (overlays show the state of synchronization).

Just relaunch NetSync, it should do the trick, but if icons are still missing :

- Go to your NetSync App (click from taskbar) and click on 
- **In Général Tab**, untick **NetSync Helper tool**.
- Click on  to save modifications.
- Windows message can ask you to confirm, click **YES**.
- **In Général TAB**, tick **NetSync Helper tool** again.
- Click on  to save modifications.

*This should repair overlays.*

Different overlays are :

- Tags
- [icone](#)
- [icones](#)
- [overlay](#)
- [overlays](#)
- [pastille](#)
- [pastilles](#)
