NetExplorer

Activate Outlook connector

Guilhem VERGON - 2025-06-16 - Configuration and administrator monitoring

You can authorize installation of NetExplorer connector for Ooutlook, from the generic panel, by user or by group.

See options

Further more, you can adjust setup of generic options for this connector.

- Login as an administrator to your NetExplorer platform and go to Configuration/features.

- Spot the line "Share and receive by links and emails", then click on "Configure"

Share and receive by links and emails
Share and receive links allow you to exchange files securely. Configure their expiration date, protection level, and much more.
Configure

- Automatic deletion can be set /on or /off
- Retention period allows you to set up the preservation time of files added within links.
