Create workgroups

Nicolas ARBOUIN - 2024-02-27 - Collaborate securely

Create workgroups

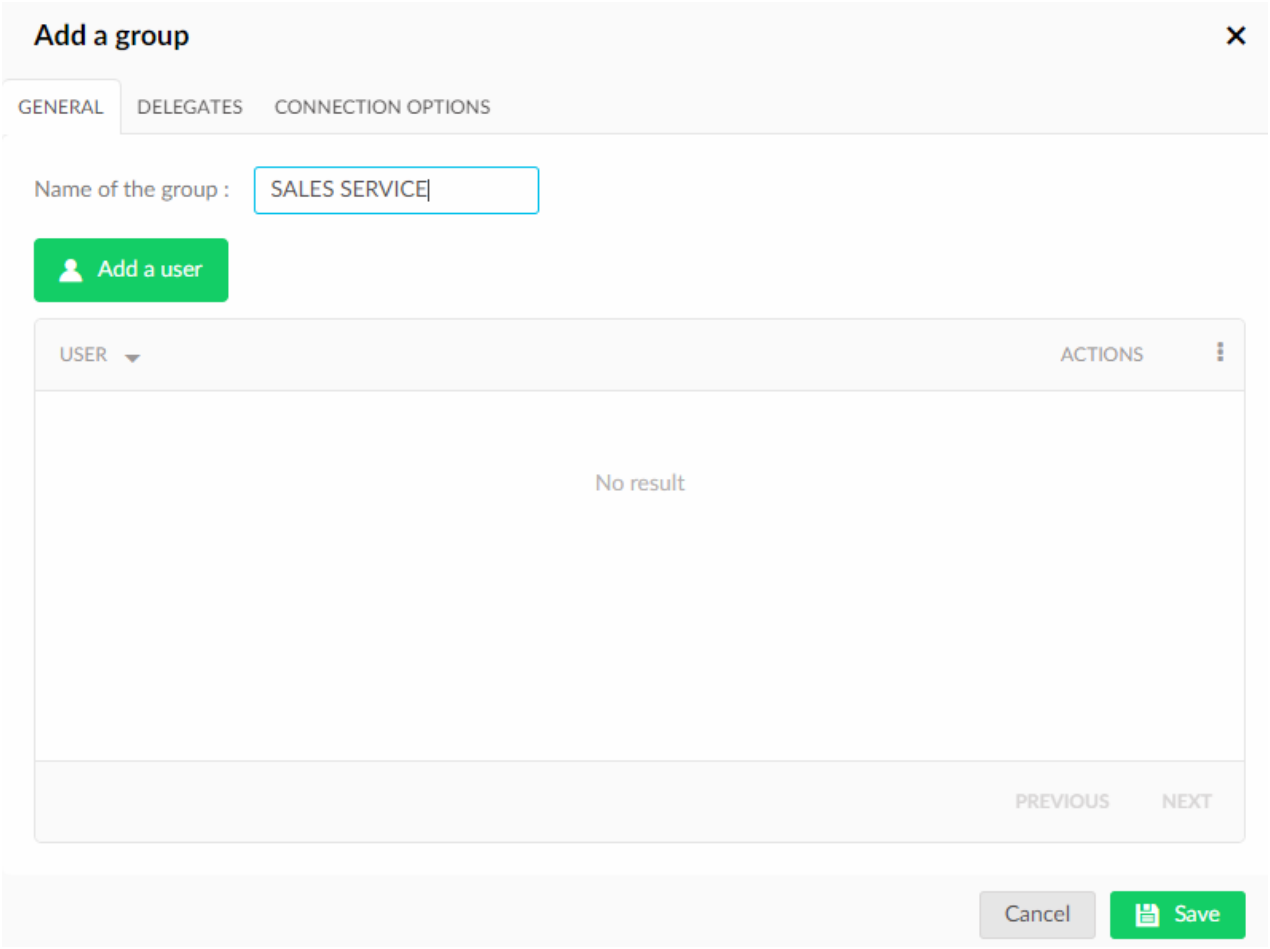
Regroup users having the same accesses,enhance,organize and save time

This page is dedicated to administrators

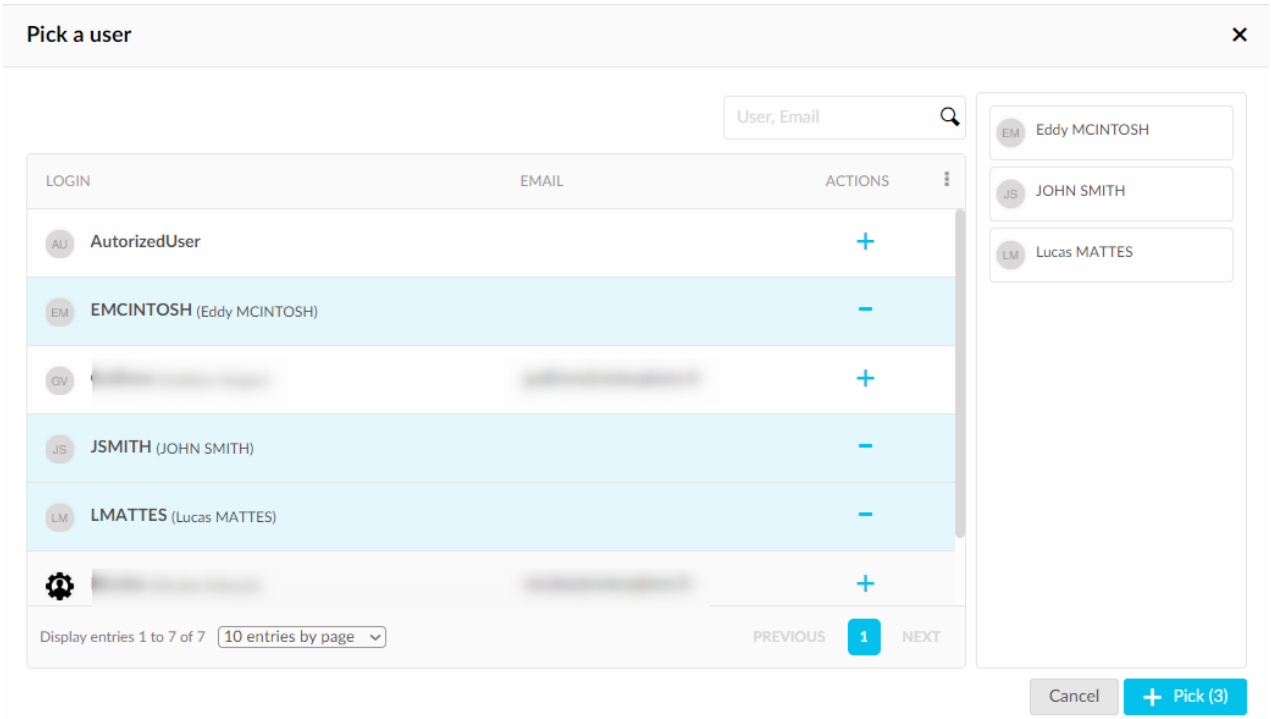
Create your groups

Using an administrator account, go to Platform Management, then in the "Groups" tab and create your group using button Add a group

Add members with the "Add" button,

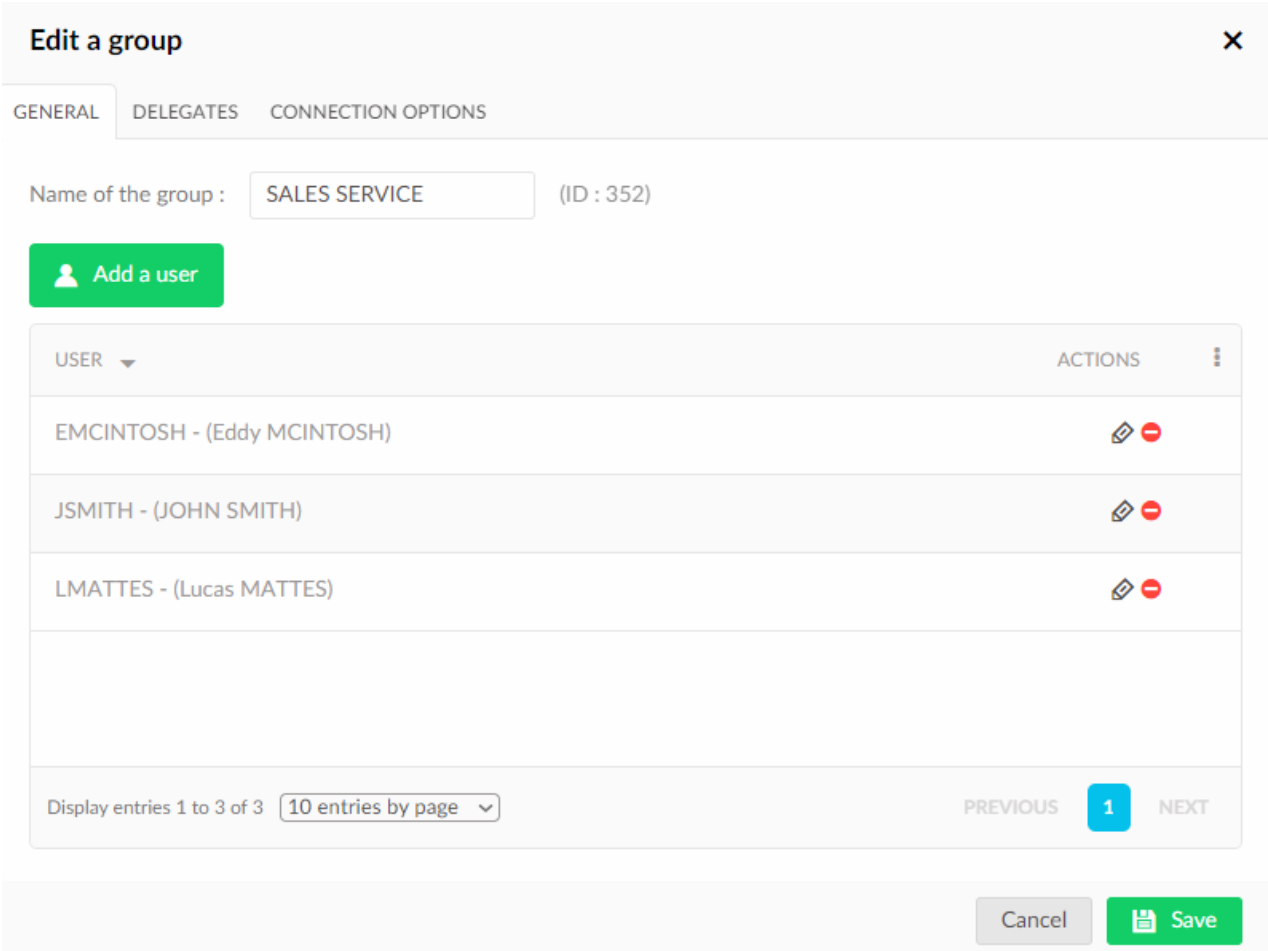


then validate and save. You can add several in a row.



Finally click on 
and then

Once validated, you will see the added users



You can now set access rights.

For further information about access rights, see that page.
