

Create and add files from mobile application (Android/iOs)

Guilhem VERGON - 2023-12-27 - Good practices

Create and add files from mobile application (Android/iOs)

Create folders or files

Easily add folders or files with button 

Menu offers to choose what you want to add, folder, files, and you can specify between 3 of the most common types of Office files or a text document.

Add elements

Add elements from button  but this time, select "upload files".

System will then offer to choose a source (files, pictures, camera) as shown below on Android

Once source and files have been selected, file or files will be transferred to current folder, as you can add more than one file at time.

File added !
