# Display NetSync icon in taskbar on Windows 10

To ensure that NetSync is properly working and synchronizing data, you can permanently.

For this :

- **Press Windows key** on your keayboard ant begin to type **Settings, click on it to open settings**.

- In Windows Settings, click on **Personalisation,** then select **Taskbar**.
- Look for "Notification area" and click on "**Select which icones appear on the taskbar**"
- You get to a list of programs, just spot NetSync and activate it by switching this button to the right. *From now, you will see NetSync icon permanently so you will know its state any time you need to.*

Icon is no longer hidden in taskbar.

Display NetSync in taskbar on Windows 7

- **Right-clik** on taskbar and select **Properties**.
- In "Notification area" click on "**Personalisation**".
- **Look for NetSync** doitin the list and select "**display icons and notifications**".
- **Click OK to validate**.
