

Manage automatic deletion from trashes

Guilhem VERGON - 2024-08-01 - Configuration and administrator monitoring

Manage automatic deletion from trashes

As an administrator you can manage automatic deletion from trashes, and so trashes can be emptied regularly and you get free space available.

Deal with trashes options

- Go to your NetExplorer platform then go to Configuration.
- In the FEATURES tab, spot the trash line and click on 
- Look at the following elements :
 - **delete_trash**: activate automatic deletion, this option is set by default.
 - **delete_trash_days**: to rule the frequency of deletion, in days. Default set is 30 days.
- Modify options you want,
- Click on 

Conservation time in trashes

Default is 30 days before elements are deleted permanently.

On 31st day, automatic deletion Au 31ième jour, une purge automatique vide l'ensemble de vos corbeilles. A cette date nous ajoutons 30 jours supplémentaires* pendant lesquels nous pouvons récupérer vos données dans nos backups.

Ainsi vous bénéficiez d'une durée de rétention de **60 jours**.
