Login

Password

Remember me

[Forgot your password?](#)

[« Previous](#)

LOG IN

Fill your credentials and press **LOG IN**

3. Authorize the app

Then you get to this page

File sharing space **NetExplorer**

The following application require access to certain ...

	<p>NetExplorer App (Android) (by NetExplorer) - Official application</p> <p>Application NetExplorer App pour appareils Android.</p>
---	--

You are connected as : **Bôb Bôbsòn** [Switch account](#)

If you allow the application to use your account, it will have access to the following elements :

- Complete access to the user's account information and documents

DENY

ALLOW

Choose **ALLOW**

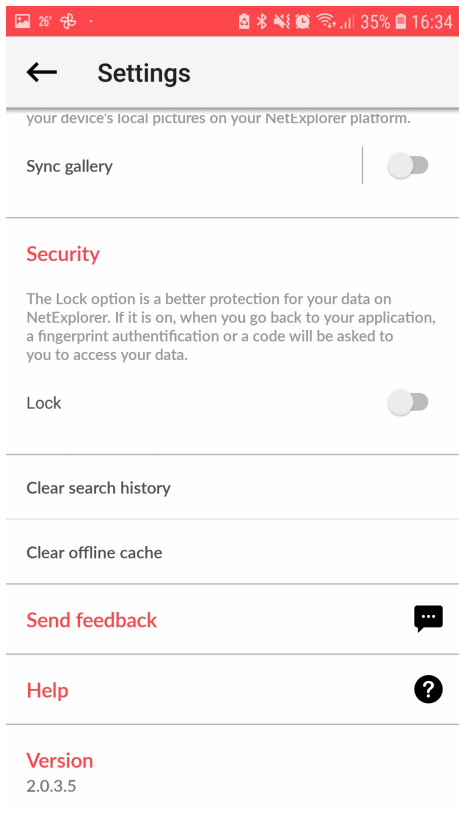

→ The app opens on recently consulted folder.

Setup of the app

Access setup menu by button 

Then you get to this page :

In, setup, you can :

- Change platform by choosing **SIGN OUT**
- Choose preferred tab : files or offline

Launch tab

- Synchronize a folder from your phone for automatic synchronization of its content

Options

"Sync gallery" option allows you to synchronize automatically your device's local pictures on your NetExplorer platform.

- For more details, please follow [this link](#)
- Activate security lock

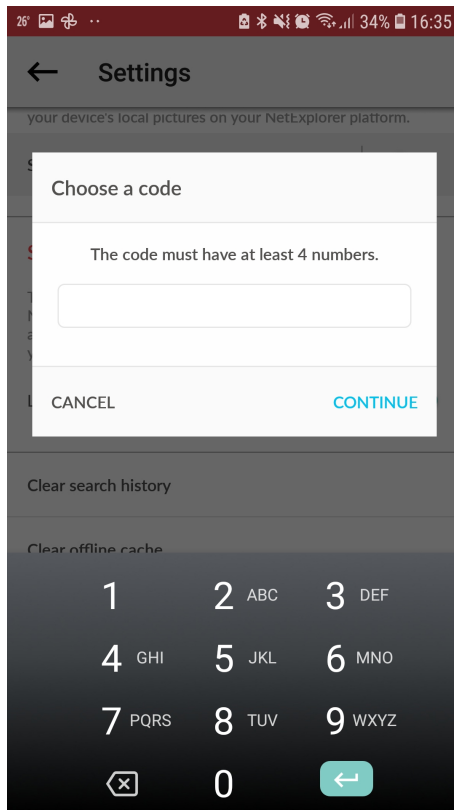

Security

The Lock option is a better protection for your data on NetExplorer. If it is on, when you go back to your application, a fingerprint authentication or a code will be asked to you to access your data.

Lock

- *Swipe the slide to the right for activation. Once activated you can create a 4 digits code, you will have to type it twice for activation and once for unlocking/deactivate.*

Once activated, the slide will look like this

- Delete historical to avoid leaving anything behind you or delete **Offline cache** to spare resources on your phone

Clear search history

Clear offline cache

- Rate us on Google Play Store

Send feedback

- Ask for HELP

Help

- See **App version**

Version

2.0.3.5

Notes

- Android App allows you to consult and share documents from any machine, with or without internet access.
- You can also edit documents, please prefer tablet for this as it will be harder on smartphone due to the size of screen.
- To enjoy of all the features, you will need **Android 7 or higher**.
