08:58

◀ App Store

Settings

Close

NetExplorer

Address https://[redacted].netexplorer.pro

Login [redacted]

Lock Off >

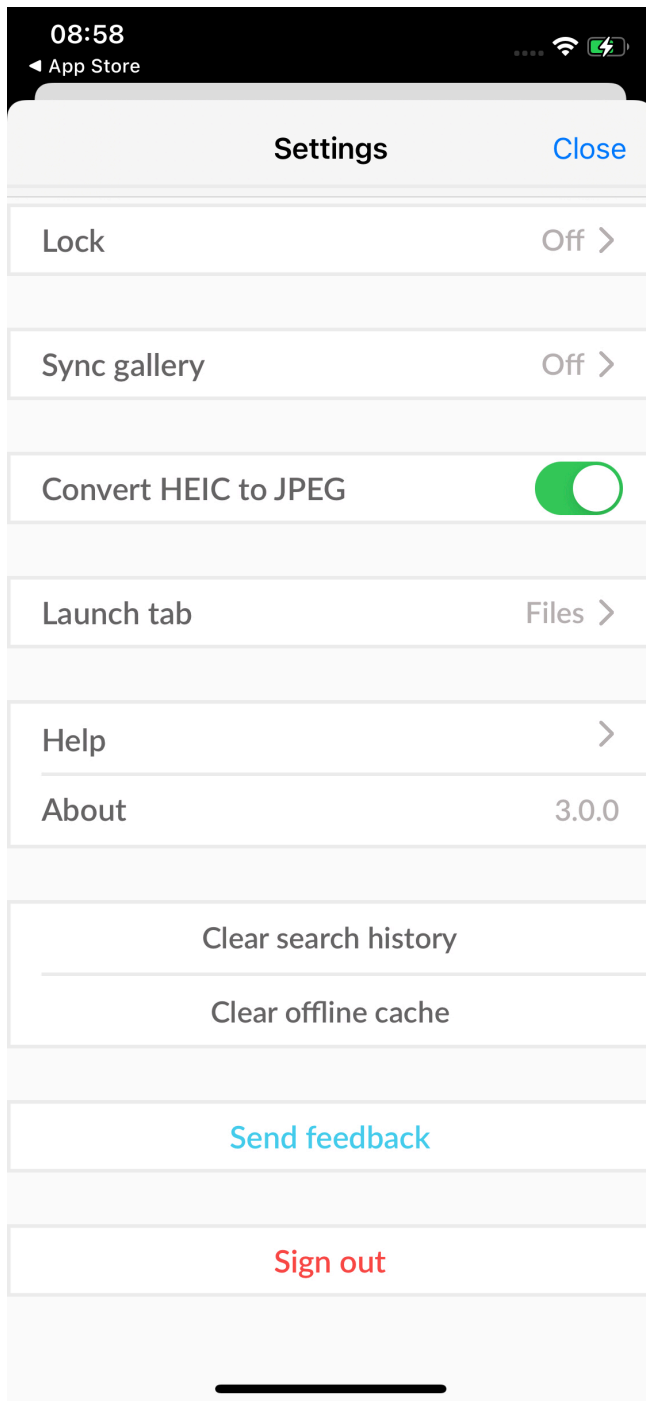

Sync gallery Off >

Convert HEIC to JPEG ☒

Launch tab Files >

Help >

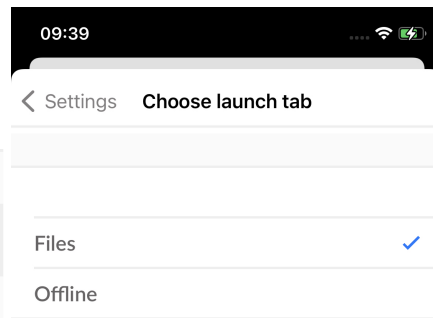

About 3.0.0

In, setup, you can :

- Change platform by choosing **Sign out**
- Choose preferred tab : files or offline

Launch tab	Files >
------------	---------

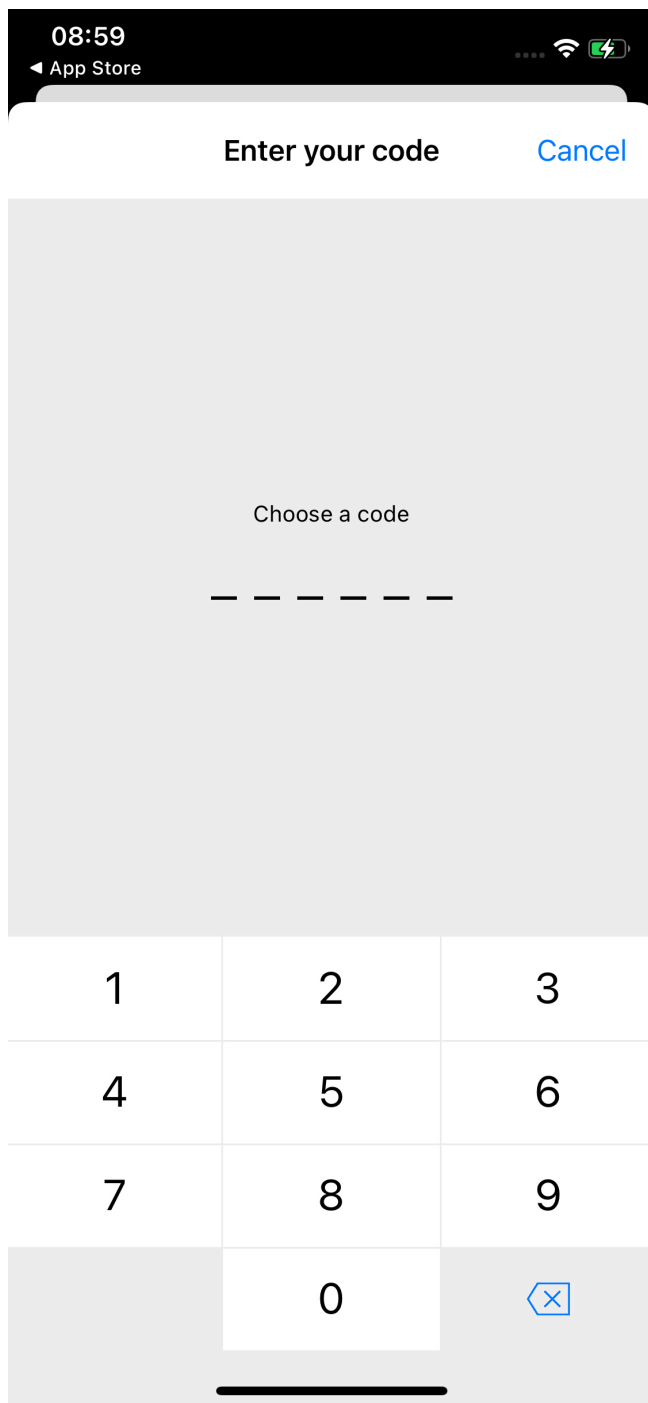

- Synchronize a folder from your phone for automatic synchronization of its content

Sync gallery	Off >
--------------	-------

- For more details, please follow [this link](#)
- Activate security lock

Lock	Off >
------	-------

Swipe the slide to the right for activation. Once activated you can create a 4 digits code, you will have to type it twice for activation and once for unlocking/deactivate.

Once activated, the slide will look like this 

- Delete **historical** to avoid leaving anything behind you.or delete **Offline cache** to spare ressources on your phone

Clear search history	
Clear offline cache	
• Rate us on Apple Store	
Send feedback	
• Ask for HELP	
Help	>
• See App version	
About	3.0.0

Notes

- iOS App allows you to consult and share documents from any machine, with or without internet access.
- You can also edit documents, please prefer tablet for this as it will be harder on smartphone due to the size of screen.
- To enjoy of all the features, you will need **iOs 12 or higher**.
