Install NetExplorer Drive

Guilhem VERGON - 2024-08-08 - Good practices

Install NetExplorer Drive

To install NetExplorer Drive on your computer :

- Go to [our site](#) and select **NetExplorer Drive** : the tool for setting up a WebDav Drive.
- Launch the installer.
- Fill-in platform URL and credentials :

A screenshot of a NetExplorer login dialog box. The dialog is centered on a blurred background of people in a meeting. At the top left of the dialog is the NetExplorer logo, a red square with a white circular arrow icon. To the right of the logo, the word "NetExplorer" is written in a large, bold, black sans-serif font. Below the logo and title, there are four input fields: "Adresse d'accès" (empty), "Identifiant" (containing "nicolas"), "Mot de passe" (empty), and a checkbox labeled "Reconnecter au redémarrage" which is checked. Below the checkbox is a dropdown menu showing "Z:" and the text "Lettre du lecteur". At the bottom right of the dialog is a red button with the white text "CONNECTER LE LECTEUR".

NetExplorer

Adresse d'accès

Identifiant

Mot de passe

Reconnecter au redémarrage

Z: Lettre du lecteur

CONNECTER LE LECTEUR

- **Platform URL** (such as <https://nameofyourplatform.netexplorer.pro>)
- **Login** (e.g. *first name.name*)
- **Password** or **application password**.
- Click on CONNECT DRIVE.

→ You just connected your drive.

For video tutorial, click [here](#) !

Notes

-
- Application password allows you to connect your Network drive with :
 - an account from external directory or method (example: Office365)
 - an account with double authentication.

[\[How to set up application password\]](#)

- Step "connect drive" can take more time on some computers where antivirus protection has been set up, especially if a scan of hard drives is activated.

Download failure

To avoid download failures on Office documents, we strongly advise to set up this way :

- From startup menu, type "download center. From the Start menu, type **Office Upload Center**. The latter opens .
- Click on 
- In the Display Options section, check all the options.
- In the **Cache settings section**: fill in the value **2** for the option How long to keep files in the Office Document Cache and check **Delete files from the Office Document Cache** when they are closed .
- Click **OK**.

NET USE command and NetExplorer Drive

Compared to a NET USE command, NetExplorer Drive can mount a network drive while bypassing some Windows limitations. This avoids disconnections without automatic reconnections, Windows does not systematically request the user's connection information,...

You can also always choose the letter on which the network drive will be installed.
