

Je n'arrive pas à inviter à collaborer

Guilhem VERGON - 2025-06-17 - Issues and solutions

You wish to invite someone to collaborate, but when you right-click on a folder, you don't have the option "invite to collaborate"

You need to check with an administrator that :

- you have the right to invite
- options are correctly set so you can invite.
 - From the Admin panel, select Configuration/Security & compliance
 - Check which options are activated.

Invitations and access rights		^
Invite to collaborate new users Allow inviting new users to collaborate: users will be invited to create an account to access the shared content.	<input checked="" type="checkbox"/>	
Invite to collaborate existing users Allow inviting existing users to collaborate: users already registered on the platform can be invited.	<input checked="" type="checkbox"/>	
Restrict invite to collaborate Prohibit users with invitation rights from granting this right to other users. This restriction does not apply to administrators and managers.	<input checked="" type="checkbox"/>
