

Je n'arrive pas à inviter à collaborer

Guilhem VERGON - 2026-03-12 - [Solutions](#)

You wish to invite someone to collaborate, but when you right-click on a folder, you don't have the option "invite to collaborate"

You need to check with an administrator that :

- you have the right to invite
- options are correctly set so you can invite.
 - From the Admin panel, select Configuration/Secutiy & compliance
 - Check which options are activated.

Invitations and access rights ^

Invite to collaborate new users
Allow inviting new users to collaborate: users will be invited to create an account to access the shared content.

Invite to collaborate existing users
Allow inviting existing users to collaborate: users already registered on the platform can be invited.

Restrict invite to collaborate
Prohibit users with invitation rights from granting this right to other users. This restriction does not apply to administrators and managers.
