No name	<span>Access method</span> <span>Not assigned</span>	Valid until 09/10/2025
---------	--	------------------------

You will find there:

- Generic information about your account

and you 'll be able to :

- Modify password (if Administrator authorized it)
- Modify information about you (If Administrator authorized it)
- See your active connexions
- Add a [2 factor authentication method](#)
- Create an Application password : When you need to connect to a NetExplorer application such as NetSync, WebDav... with an external account like SSO (Office365, Active Directory...), you will need an [Application password](#), one for each application used.
