### Stay tuned for updates

Nicolas ARBOUIN - 2025-02-06 - Collaborate securely

Stay tuned for updates For every folder, you can be alerted by email, for any modification or adds on the folder you asked to be

warned.

# Subscribe notifications You can subscribe to notifications on necessary folders. To manage subscriptions :

- Spot your folder.
- Right click on it and select "Details".

• In the right part of the screen that opens, in "activity" tab, click on the bell to make it blue

## <u>Notes</u>

- When adding a document, alert is not sent instantly. There is a 15-40 minutes for treatment, that time also depends of the time set by your administrator in the platform configuration.
- The set of an alert is not retro active, it will be active for further additions of documents.
- If you wish to be warned of your own deposits, it is necessary to be a member of an already subscribed group or have activated a specific option in platform configuration. Ask your administrator for the "Alert\_self\_notification" option, located in the Configuration menu, "General" tab.

## This part is dedicated to administrators

For every folder you can configure email alerts to warn users of groupes of any modifications. To set an alert, user or groupe needs at least to have the "read" right.

How to manage alerts as an administrator ?

To configure notifications as an administrator :

- Go to your platform and spot your folder.
- Right click on it and select "Details".
- On right of your screen in the "Details" tab, spot the name of folder and click on symbol 🔅 to access administrator options.
- Select "Manage alerts".

Nev	×	
Size	16.8	Manage access rights
