

## February 2026 Update

2026-01-26 - Guilhem VERGON - [Changelog](#)

*Update published in the evening of 2026 February 10th*

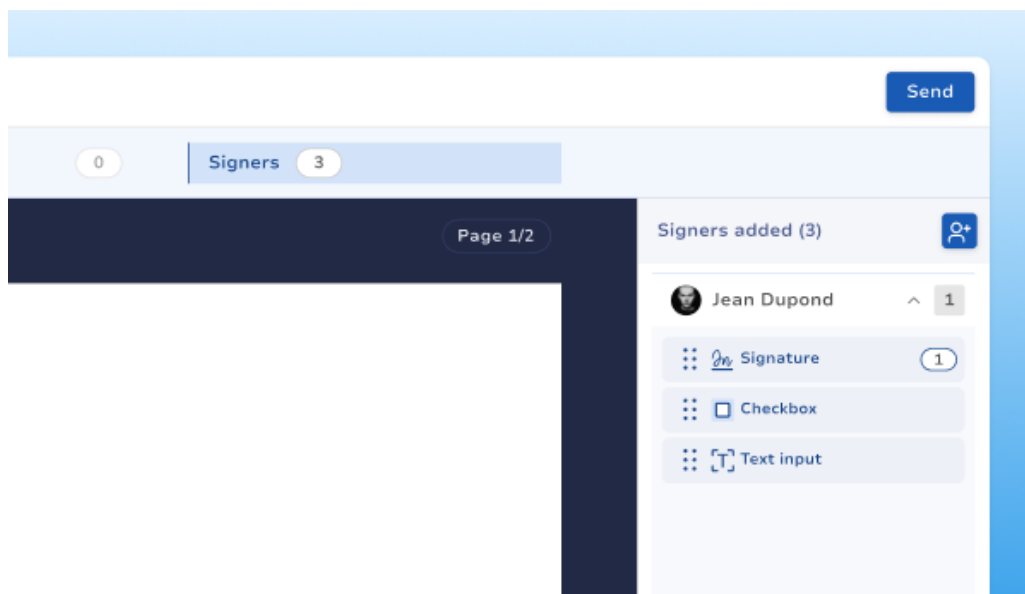

### Creation of signature request

- Add of a **complete electronic signature solution** supporting **eIDAS Simple, Advanced and Qualified levels**.
- Creation of signature request in three modes :
  - **Sequential (predefined signature orders)**,
  - **Simultaneous/Parallel** (parallel signing),
  - **Mass** (autonomous sending (without coordination between each)).

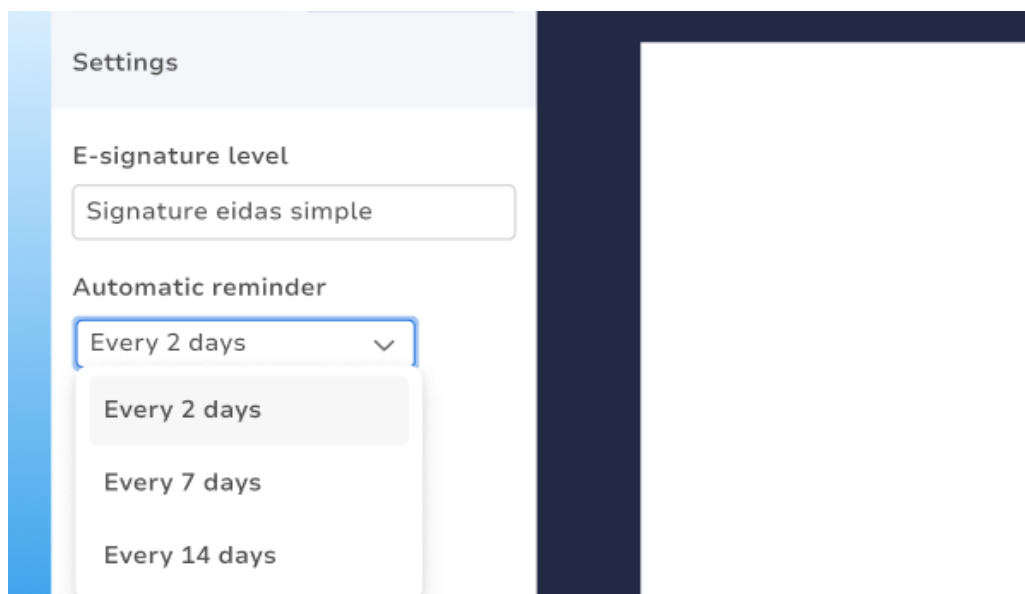

- Integration of **optional prior approval** for sequential and simultaneous signatures.
- Ability to add **carbon copy members** (up to 50 recipients).
- Advanced setup of documents to be signed :

- Add of fields (signature, text, checkbox, initials),
- Multiple PDF files management (up to 50 files, 50MB per file)

- Setting up of **configurable automatic reminders** (2, 7 or 14 days, up to 5 times).

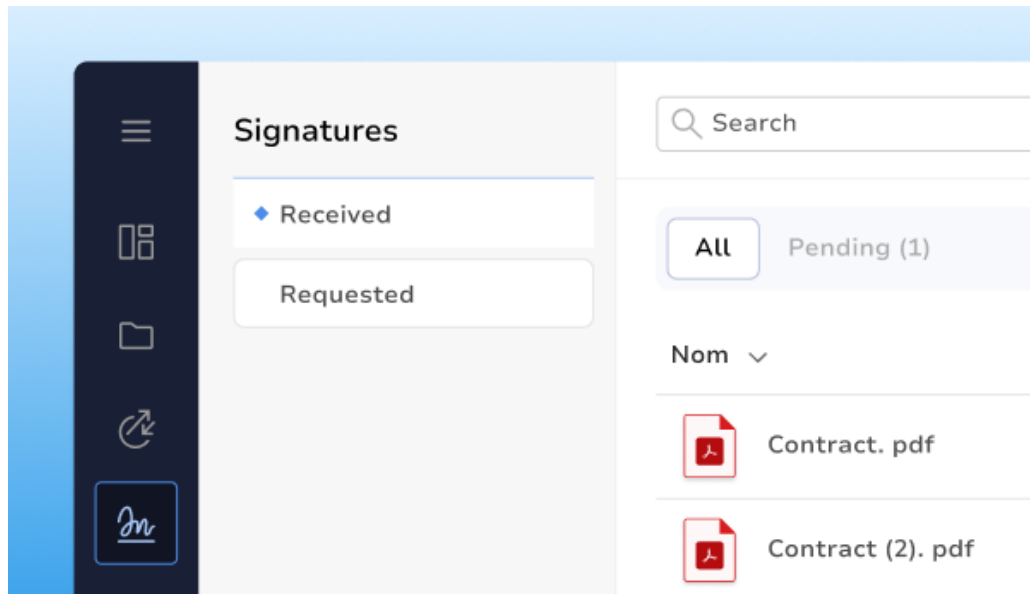

---

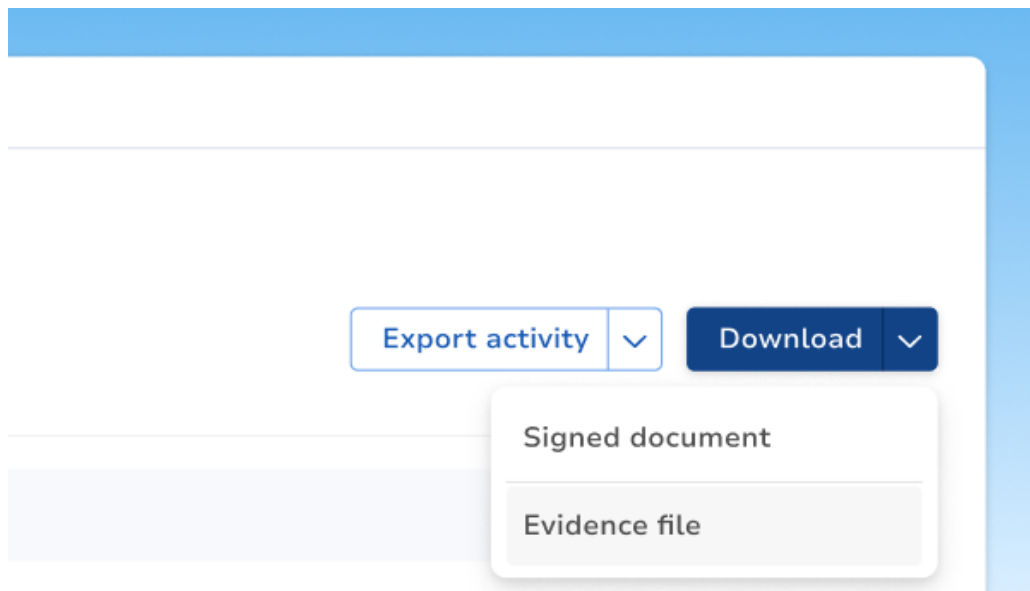

## Signature tracking

- New **“Received signatures”** section available for every user with the Netexplorer Sign option.

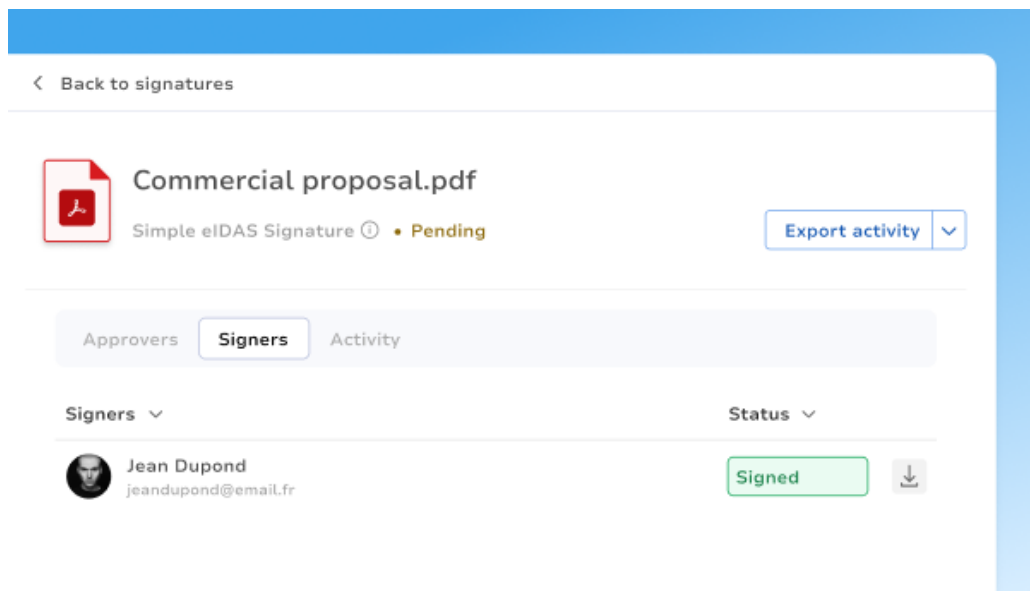

- New “**Requested signatures**” section for users with this option, with history preservation even after removal.

- Filters by status :
  - **Received** : All, Pending, Completed, Rejected.
  - **Requested** : All, Pending, Completed (Obtained/Rejected), Drafts, Canceled.
- View the **reason for rejection** by signer or approver.
- Secure download :
  - Proof folders and signed files for obtained request,
  - Signed files for received signatures once signed.

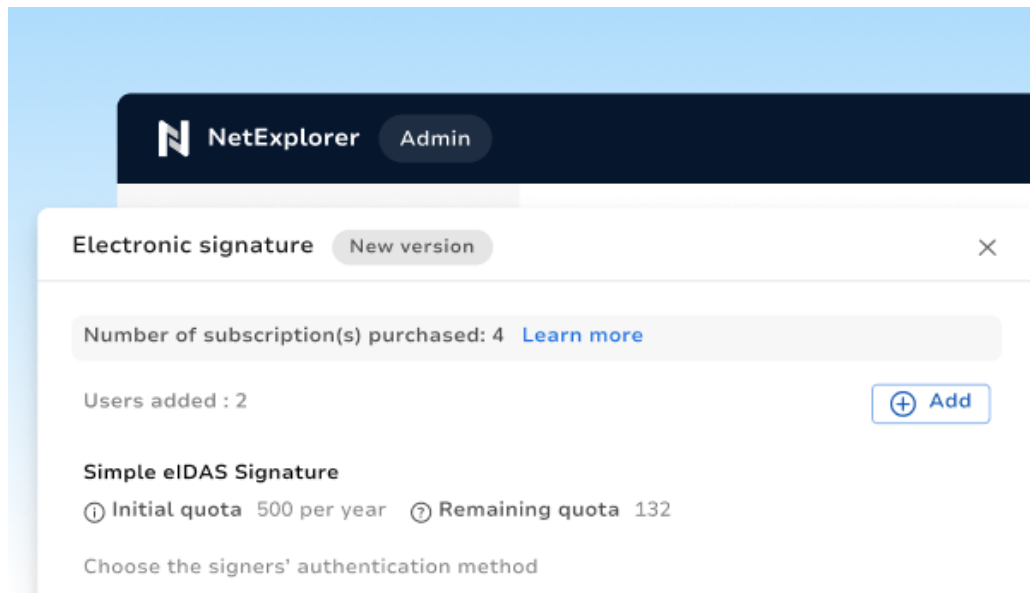

- **Export of tracking and activity data** in CSV et XLS formats.
- Detailed workflow display :
  - Full view of signatories and approvers for sequenced signatures,
  - View per signatory for parallel signatures.

## Administration & Management

- Management of **subscriptions**, quotas and credits via sales department.
- On-demand add of **additional quotas and credits** via sales department.
- Setting up of **automatic alerts** :
  - Insufficient quotas or credits,
  - Maximum user capacity reached.

- Assignment, withdrawal and reassignment of the Netexplorer sign option per user.
- Configuration of **authentication methods for eIDAS Simple** :
  - No authentication,
  - OTP via e-mail,
  - OTP via SMS.
